## PRESS RELEASE

## Image and caption:

Fig. 1: MB-Sindelfingen\_Bild-1\_(c)\_EMW-Stahl-Service-Center.jpg Caption: CO2-reduced steel from EMW Steel Service Centre for the automotive industry

## About EMW Stahl-Service-Center (<u>www.emw-stahlservice.de/en/</u>):

As one of the largest mill-independent steel service centres in Europe, EMW supplies coils, slit strip, blanks and circular blanks to the steel processing industry. Divided between the two sites in Neunkirchen (North Rhine-Westphalia) and Treuen (Saxony), EMW constantly stores more than 220,000 tonnes of thin sheet. Almost all marketable qualities are therefore available: standard and special grades, mainly hot-dip and electrolytically galvanised, cold-rolled, hot-rolled and hot-dip aluminised.

On six slitting lines, three multi-blanking lines, two cut-to-length lines and one cut-to-length line, EMW processes sheets in the thickness range from 0.4 to 6 millimetres with coil weights of up to 32 tonnes. A comprehensive package of automotive and industrial grades, high-strength steels and enamelling grades as well as a high-performance organisation for transport logistics are among the company's particular specialities. EMW's quality guarantee, process reliability and environmental protection are ensured by certifications in accordance with DIN ISO 9001:2008, IATF 16949:2016 and ISO 14001:2004. EMW is a division of the internationally successful SCHÄFER WERKE group of companies based in Neunkirchen.
